Invasive Non-native Species (INNS) - Priority Species for Action in Wales

The purpose of this list is to help prioritise action on invasive non-native species (INNS) in Wales.

The list follows the Convention on Biological Diversity (CBD) three stage hierarchical approach for invasive non-native species (also enshrined in the GB Strategy) prioritising:

- a. Prevention; followed by,
- b. Early detection and rapid response; followed by,
- c. Long term strategic management.

The list takes into account the risk posed by a species (assessment score) and whether or not an effective, strategic and sustainable management is possible based following the CBD hierarchy. These priorities have been informed by horizon scanning, risk analysis (comprising both risk assessment and risk management) and consultation with the WBP INNS Group, GB NNSS, NRW and Welsh Government.

Species are listed as:

- 1. Prevention priority species Not in Wales, but likely to arrive. If detected a rapid response would be needed.
- 2. Management priority species Present or recently present in the wild in Wales in low numbers or limited isolated populations. To prevent widespread establishment of species eradication is required / feasible / desirable.
- 3. Long-term management priority species Species established in Wales where long term management is feasible and beneficial (e.g. protecting key areas, containment, control or mitigation).

Species include:

- GB priorities already agreed by the GB Programme Board for Non-native Species
- Invasive Alien Species of Union Concern.
- Species that are a national priority for Wales, but not covered by the previous points.

The list is a working document and will be reviewed every six months.

1. PREVENTION PRIORITY SPECIES

Not in Wales, but likely to arrive. If detected a rapid response would be needed.

Species name	Common name	Group	Habitat	Justification for selection
Ameiurus melas	Black bullhead	Fish	Freshwater	GB eradication priority
Baccharis halmifolia	Saltbush/Groundsel Tree	Plant	Terrestrial	Invasive Alien Species of Union Concern
Cabomba caroliniana	Fanwort or Carolina water shield	Plant	Freshwater	Invasive Alien Species of Union Concern
Corbicula fluminea	Asian clam	Mollusc	Freshwater	National priority for Wales
Dresissena bugensis	Quagga mussel	Mollusc	Freshwater	National priority for Wales Alert Species RISC Species
Gyrodactylus salaris	A fish parasite	Flatworm	Freshwater	Notifiable disease under Diseases of Fish Act 1937 GB eradication priority
Homarus americanus	American lobster	Crustacean	Marine	National priority for Wales
Lasius neglectus	Invasive garden ant	Insect	Terrestrial	GB eradication priority Alert Species
Lithobates catesbeianus	American bullfrog	Amphibian	Freshwater	GB eradication priority Invasive Alien Species of Union Concern RISC Species
Myiopsitta monachus	Monk parakeet	Bird		GB eradication priority

Species name	Common name	Group	Habitat	Justification for selection
Ocenebra inornata	Asian/Japanese oyster drill	Mollusc	Marine	National priority for Wales
Orconectes limosus	Eastern Crayfish	Invertebrate	Freshwater	Invasive Alien Species of Union Concern
Orconectes virilis	Virile crayfish	Invertebrate	Freshwater	Invasive Alien Species of Union Concern
Pracambarus clarkii	Red swamp crayfish	Invertebrate	Freshwater	Invasive Alien Species of Union Concern
Rapana venosa	Asian rapa whelk	Mollusc	Marine	National priority for Wales Ballast Water Regulations
Tamias sibiricus	Siberian chipmunk	Mammal	Terrestrial	Invasive Alien Species of Union Concern
Threskiornis aethiopicus	Sacred Ibis	Bird		Invasive Alien Species of Union Concern
Urosalpinx cinera	American oyster drill	Mollusc	Marine	National priority for Wales
Vespa velutina	Asian hornet	Insect		Invasive Alien Species of Union Concern Alert Species RISC Species
Xenopus laevis	African clawed toad/frog	Amphibian	Freshwater	GB eradication priority

2. MANAGEMENT PRIORITY SPECIES

Present or recently present in the wild in Wales in low numbers or limited isolated populations. To prevent widespread establishment of species eradication is required / feasible / desirable.

Species name	Common name	Group	Habitat	Justification for selection
Acaena novae- zelandiae	Pirri-pirri bur	Plant	Terrestrial	National priority for Wales
Carpobrotus edulis	Hottentot fig	Plant	Terrestrial	National priority for Wales
Cervus nippon	Sika deer	Mammal	Terrestrial	National priority for Wales
Disphyma crassifolium	Purple dewplant	Plant	Terrestrial	National priority for Wales
Hydrocotyle ranunculoides	Floating pennywort	Plant	Freshwater	Invasive Alien Species of Union Concern RISC Species
Ludwigia grandiflora	Water primrose	Plant	Freshwater	Invasive Alien Species of Union Concern Alert species GB eradication priority
Mesotriton alpestris	Alpine newt	Amphibian	Freshwater	National priority for Wales
Oxyura jamaicensis	Ruddy duck	Bird		Invasive Alien Species of Union Concern GB eradication priority
Pseudorasbora parva	Topmouth gudgeon	Fish	Freshwater	Invasive Alien Species of Union Concern GB eradication priority
Sarracenia purpurea	Pitcher plant	Plant	Terrestrial	National priority for Wales

Species name	Common name	Group	Habitat	Justification for selection
Zamensis longissimus	Aesculapian snake	Reptile	Terrestrial	National priority for Wales

3. LONG-TERM MANAGEMENT PRIORITY SPECIES

Species established in Wales where long term management is feasible and beneficial (e.g. protecting key areas, containment, control or mitigation).

Species	Common name	Group	Habitat	Justification
Didemnum vexillum	Carpet seasquirt	Tunicate	Marine	Alert Species
Dikerogammerus villosus / Dikerogammerus haemobaphes	Killer shrimp / Demon shrimp	Crustacean	Freshwater	Alert Species Daisie 100 RISC Species
Eriocheir sinensis	Chinese mitten crab		Marine	Invasive Alien Species of Union Concern RISC Species
Fallopia japonica	Japanese knotweed	Plant	Terrestrial	National Priority for Wales
Heracleum mantegazzianum	Giant hogweed	Plant	Terrestrial	DAISIE top 100
Hippophae rhamnoides	Sea buckthorn	Plant	Terrestrial	National Priority for Wales
Impatiens glandulifera	Himalayan balsam	Plant	Terrestrial	DAISIE top 100 RISC Species
Lagarosiphon major	Curly waterweed	Plant	Freshwater	Invasive Alien Species of Union Concern

Species	Common name	Group	Habitat	Justification
Lysichiton americanus	Skunk cabbage	Plant	Freshwater	Invasive Alien Species of Union Concern RISC Species
Muntiacus reevesi	Reeves's munjac	Mammal	Terrestrial	Invasive Alien Species of Union Concern RISC Species
Myriophyllum aquaticum / brasiliense	Parrot's feather	Plant	Freshwater	Invasive Alien Species of Union Concern
Pacifastacus leniusculus	Signal crayfish		Freshwater	Invasive Alien Species of Union Concern RISC Species
Rhododendron ponticum (& hybrids)		Plant	Terrestrial	DAISIE top 100
Rosa rugosa	Japanese rose	Plant	Terrestrial	DAISIE top 100
Sciurus carolinensis	Grey squirrel	Mammal	Terrestrial	Invasive Alien Species of Union Concern
Tiostrea lutaria	New Zealand oyster	Mollusc	Marine	National Priority for Wales
